77th International Conference on Agricultural Engineering

LAND.TECHNIK AgEng 2019

The Forum for Agricultural Engineering Innovations

November 8th–9th 2019, Hannover

VDI-BERICHTE

Herausgeber:

VDI Wissensforum GmbH

Content

► **Analysis of Drive Trains**

Model-Based Chiptuning Detection of Diesel Engines 1
M. Hinrichs, P. Pickel, John Deere GmbH, Kaiserslautern
R. Isermann, Institute of Automatic Control, Darmstadt

An Analysis of the Energy Consumption in the High-Pressure System of an Agricultural Tractor through Modeling and Experiment 9
X. Tian, A. Vacca, Purdue University, West Lafayette, IN, USA;
S. Fiorati, F. Pintore, CNH Industrial S.p.A, Modena, Italy

Multi-Domain Simulation for the Assessment of the NVH Behaviour of a Tractor with Hydrostatic-Mechanical Power Split Transmission 19
G. Pasch, G. Jacobs, G. Höpfner, J. Berroth, Institute for Machine Elements and Systems Engineering, RWTH Aachen University, Aachen

Methods to evaluate steering performance of agricultural tractors. 29
S. Liljenberg, M. Frederiksen, T. H. Langer, Danfoss Power Solutions, Nordborg, Denmark

► **Tyres and Soil**

Soil pressure and pulling behavior of standard and half-track tractor chassis concepts. . . . 35
T. Fedde, M. Peeters, CLAAS Tractor, Velizy/Paderborn;
R. Stirnimann, Bern University of Applied Sciences, HAFL

Development of a tire-soil interaction model for agricultural tractors 47
A. Lajunen, University of Helsinki, Finland

Field performance of Trelleborg PneuTrac tyres 57
G. Molari, M. Mattetti, M. Varani, Department of Agricultural and Food Sciences – Alma Mater Studiorum, University of Bologna, Bologna, Italy;
F. Paolini, S. Fiorati, CNH Industrial – Tractor Innovation Engineering, Modena, Italy;
P. Mancinelli, K. Štefek, C. Di Dio, Trelleborg Wheel Systems, Tivoli, Italy

► **Data Management**

AEF – Partnership to develop open standard for cloud communication 63
N. Schlingmann, Agricultural Industry Electronics Foundation AEF e.V., Frankfurt;
V. Vandecaveye, CNH Industrial Belgium N.V., Zedelgem, Belgium;
C. Gossard, John Deere, Mannheim;
P. van der Vlugt, Kubota Innovation Center Europe, Nieuw-Vennep, Netherlands
K. H. Rolf, CLAAS KGaA, Harsewinkel

agrirouter: First user experiences and next steps with the manufacturer-independent data exchange platform 69
J. Sonnen, J. Möller, A. Hammerschmidt, DKE-Data GmbH & Co. KG, Osnabrück

Next Machine Management – A new Ag-Software generation. 77
H. Schallermayer, aag (agricultural application group), Frankfurt

DataConnect – A solution for Cloud to Cloud data exchange 83
H. J. Nissen, John Deere GmbH & Co. KG, Intelligent Solutions Group, Kaiserslautern;
A. Kluge, CLAAS E-Systems GmbH, Dissen a.T.W.;
D. Cowan, N. Shafer, John Deere Intelligent Solutions Group, Urbandale, USA

► **Data Management – Networks**

High Speed ISOBUS, an AEF Project for next generation Ag networking 91
D. Smart, John Deere, Waterloo, Iowa, USA;
V. Brill, CLAAS, Dissen

Advanced On-board Electronics Architecture with Automotive Ethernet. 107
M. Ehrl, G. Happich, AGCO GmbH, Marktoberdorf

Open Integrated Data Platform for Agricultural Machinery – Connecting the Agricultural Production Process 113
G. Kormann, H. J. Nissen, S. Stahlmecke, John Deere GmbH & Co. KG, Intelligent Solutions Group, Kaiserslautern

► **Drives**

Electric mechanic power split PTO for implements 119
C. Gentz, G. Jacobs, C. Wyrwich, Institute for Machine Elements and Systems Engineering,
RWTH Aachen University;
J. Münch, M. Marsel, M. Lindner, T. Herlitzius, Institute for Natural Materials Technology,
Technische Universität Dresden

eCVT for Tractors – Continuously Variable Driving and Electric Power for Implement Drives . . 127
R. Himmelsbach, J. Pohlenz, ZF Friedrichshafen AG, Friedrichshafen;
K. Grad, ZF Friedrichshafen AG, Passau

Power Trains, Electric Drives and Mobile Hydraulics 135
S. Igl, G. Grömmner, M. Auer, K. Grad, ZF Friedrichshafen AG, Passau

Hydraulics in electrified machines – Electrification needs high efficiency 145
D. Peitsmeyer, Bucher Hydraulics, Klettgau

► **Field Robotics**

Design and Development of an Autonomous Mower for Agricultural Use 153
R. Schildroth, Redshield Consulting, Ely, USA

Autonomous tractors harrowing and sowing simultaneously 159
T. Oksanen, R. Soitinaho, J. Huuskonen, V. Väyrynen, Aalto University, Dept. of Electrical
Engineering and Automation, Espoo, Finland

Automated site-specific overseeding of grassland 165
M. Sax, R. Latsch, T. Anken, Agroscope, Ettenhausen, Switzerland;
V. Moser, CSEM SA, Neuchâtel, Switzerland;
P. Krummenacher, Krummenacher Saattechnik AG, Dietwil, Switzerland

► **Automation**

'Virtual Harvesting' as a Key Element in the Development of a novel LiDAR based Combine Harvester Steering System 173
J. Redenius, CLAAS E-Systems GmbH, Dissen;
S. Belau, D. Irmer, R. Middelberg, S. Spiekermann, CLAAS Selbstfahrende Erntemaschinen GmbH, Harsewinkel;
C. Bußmann, T. Sellschopp, Ibeo Automotive Systems GmbH, Hamburg;
A. Ruckelshausen, Osnabrück University of Applied Sciences;
J. Hertzberg, Osnabrück University and DFKI, Osnabrück

Predictive driving strategy for radar-based slope detection in tractors 179
M. Birk, B. Volpert, ZF Friedrichshafen AG, Friedrichshafen;
M. Auer, ZF Friedrichshafen AG, Passau

Machine Learning for Process Automation of Agricultural Machines in Field Applications . . . 187
S. Becker, K. Daiß, K. Daaboul, K. Kurzer, M. Geimer, KIT Karlsruhe Institute of Technology, Karlsruhe;
J. M. Zöllner, KIT Karlsruhe Institute of Technology, Karlsruhe, FZI Research Center for Information Technology, Karlsruhe

An integrated OEM and retrofit Spray quality monitor system for agricultural Sprayers. . . . 199
P. Hien, T. Krauland, MSO GmbH, Bad Münstereifel

► **Harvesting Technology**

Validation of a particle simulation of potatoes under harvesting-like conditions 205
L. Poppa, L. Frerichs, Institute of Mobile Machines and Commercial Vehicles, Technische Universität Braunschweig;
B. Niemöller, Grimme Landmaschinenfabrik GmbH & Co. KG, Damme

Continuous harvesting of olive orchards with wide canopies in hedge 213
J. O. Peça, A. B. Dias, A. Pinheiro, Instituto de Ciências Agrárias e Ambientais Mediterrânicas (ICAAM)/Departamento de Engenharia Rural da Universidade de Évora, Núcleo da Mitra, Évora, Portugal;
J. M. Falcão, Torre das Figueiras Sociedade Agrícola Lda., Herdade da Torre das Figueiras, Monforte, Portugal

Production of high quality wood chips for energetical exploitation by using a two-step-chipper and ventilation with ambient air 223
R. Kahle, S. Firus, T. Herlitzius, Institute of natural materials technology, Agricultural systems and technology, Technical University of Dresden

► **Operating Systems**

Development of a Seamless User Experience for Smart Farming Applications – From Machine Interaction to System Synergy229
A. Hackfort, G. Happich, M. Lichtenstern, AGCO GmbH, Marktoberdorf

A Field Tested Adaptive User-Interface – New Ways to Operate Tractors.235
T. Schempp, Institute for Agricultural Engineering, University of Hohenheim, Stuttgart;
A. Kaufmann, Institute for Engineering Design and Industrial Design University of Stuttgart;
I. Stöhr, elobau GmbH & Co. KG, Leutkirch

Ergonomic and compact armrest of agricultural tractors – Innovative methods to design an ergonomic armrest243
C. Campanella, K. Huber, G. Monacelli, L. Ungaretti, M. D'Orazio, G. Scotto di vetta,
CNH Industrial S.p.A., Modena, Italy;
M. Peruzzini, F. Grandi, University of Modena and Reggio Emilia, Modena, Italy

FELDSCHWARM®-UI: A User Interface for Controlling Swarm Technology253
S. Lorenz, H. Wanta, J. Krzywinski, T. Herlitzius, Technische Universität Dresden, Dresden

► **Product Development**

Approach to reduce the complexity increase in development processes of mobile machines.265
H. Neurath, L. Frerichs, Institute of Mobile Machines and Commercial Vehicles, Technische Universität Braunschweig

Implementation of a Dynamic Product Development Method for Agricultural Engineering Based on Virtual Prototypes273
P. Sivasothy, G. Bulun, J. Seewig, Institute for Measurements and Sensor-Technology,
Technische Universität Kaiserslautern;
J. Imwalle, ANEDO Ltd.

Multi-domain simulation of agricultural system solutions.281
M. Piechnick, marpitec GmbH, Aschaffenburg

Remotely Controlled Electro-Hydraulics ready for the IoT289
G. Bombarda, Bondioli & Pavesi s.p.A., division HP Hydraulic s.p.A, Pieve di Cento, Italy;
T. Maxeiner, Bondioli & Pavesi GmbH, Groß Gerau

► **Tractors**

Development of a compact After-Treatment System for agricultural tractors295
L. Levato, C. De Marco, P. Tamamidis, G. Monacelli, S. Panunzio, CNH Industrial, Modena, Italy

Four-Tracked Solution for Large Row Crop Tractors.305
J. L'Heureux, Deere & Company, Waterloo, Iowa USA

Idling of agricultural tractors. 311
M. Mattetti, G. Molari, Department of Agricultural and Food Sciences – Alma Mater Studiorum,
University of Bologna, Bologna, Italy;
S. Fiorati, N. Lenzini, CNH Industrial – Tractor Innovation Engineering, Modena, Italy

► **Precision Farming**

GIS-ELA – Open Source GIS system for small-scale agriculture319
L. Hauer, L. Handl, P. Prankl, M. Datzberger, Josephinum Research, Wieselburg;
F. Handler, BLT, Wieselburg;
S. Polly, Landwirtschaftskammer Niederösterreich, St. Pölten

High Definition Yield Maps for Precision Ag Decision Support327
M. J. Darr, M. M. Qasaimeh, C. J. Murphy, B. R. Covington, Iowa State University, Ames, IA USA;
V. Fuchs, T. Schaefer, F. Pardina, B. Reddy, J. Petri, T. Fuege, J. Hinze, Deere & Company,
Kaiserslautern

Growing Smart Farming Services – How to get the best out of farming data335
S. Braun, M. Trapp, C. Nass, M. Gerbershagen, S. Schweitzer, R. Falcão, Fraunhofer IESE,
Kaiserslautern;
M. Schweitzer, N. Wire, John Deere European Technology Innovation Center, Kaiserslautern

Process Operation Map for Assessment of ideal Configuration and Behaviour341
T. Steckel, CLAAS E-Systems GmbH, Dissen a. T. W.

► **Soil and Fertilisation**

Broadband SHF Radar measurements for soil moisture estimation in the range between 1 and 18 GHz	347
M. Trimmel, P. Riegler-Nurscher, R. Streimelweger, Josephinum Research, Wieselburg	

SoilReader: A new in-situ multi-depth, multi-constituent, on-the-go precision soil analyzer	355
A. Biswas, Associate Professor, University of Guelph, Guelph, Ontario, Canada; E. Eising, Founder and CEO, SoilReader, Winnipeg, Manitoba, Canada	

Automated mobile field laboratory for on-the-go soilnutrient analysis with the ISFET multi-sensor module	377
V. Tsukor, S. Hinck, A. Ruckelshausen, University of Applied Sciences Osnabrueck, Osnabrueck; W. Nietfeld, Bodenprobetechnik Nietfeld GmbH, Quakenbrueck; T. Mosler, H. Tesch, MMM tech support GmbH & Co. KG, Berlin; F. Lorenz, E. Najdenko, LUFA Nord-West, Oldenburg; A. Moeller, ANEDO GmbH, Eydelstedt; D. Mentrup, iotech GmbH, Osnabrueck	

A robust plant localization and identification system for precision farming – The effects of uncontrolled illumination on an end-to-end deep-learning plant detection algorithm . . .	383
T. M. J. Ruigrok, L. Voorhoeve, G. Kootstra, E. J. van Henten, Farm Technology Group, Wageningen University, The Netherlands	

► **Cyber Physical Systems**

Modular Multi-Purpose Battery Storage System for complex compartments – New module design approach for maximizing benefits of work machines	391
M. Hammer, M. Steffan, INVENOX GmbH, Garching	

Swarm Unit – Development of a Fully Electric Agricultural Machine with External Power Supply.	401
S. Pfaffmann, F. de Moraes Boos, N. Tarasinski, V. Kegel, John Deere GmbH & Co. KG, Kaiserslautern	

Feldschwarm – Modular and Scalable Tillage Systems with Shared Autonomy.	409
T. Herlitzius, Faculty of Mechanical Engineering and Science, Technical University Dresden; H. Fichtl, Fraunhofer Institute for Transportation and Infrastructure Systems IVI, Dresden; A. Grosa, M. Henke, M. Hengst, Faculty of Mechanical Engineering and Science, Technical University Dresden	

► **Optimization of Farm Work**

Production System Optimization with Electrified Powertrain421
S. A. Duppong, M. Kuhl, John Deere Waterloo Works Product Engineering Center,
Waterloo, IA, USA;
O. Delvaux, Ets Joskin S.A., Soumagne, Belgium

**Optimization of tractor front loader for improved design freedom and increased
operability** .427
B. Oskarsson, E. Westergaard, T. H. Langer, Danfoss Power Solutions, Nordborg, Denmark

**Mobile intelligence for LEMKEN equipment – A retrofittable intelligent hardware generates
additional value for various agricultural implements** .433
H. Vennemann, M. van den Boom, H. Hecheltjen, LEMKEN GmbH & Co. KG, Alpen

Approach for increasing automation progress in root crop harvesting439
D. Bösenberg, W. Strothmann, C. Halbrügge, GRIMME Landmaschinenfabrik GmbH & Co. KG,
Damme;
H. Korte, Faculty of Agricultural Sciences and Landscape Architecture, University of Applied
Sciences, Osnabrueck

► **Automation Concepts**

**Development of future machine concepts for the needsbased fertilisation of individual
plants – The RAUCH MultiRate dosing system for pneumatic spreaders AERO GT
and AERO X.** .447
V. Stöcklin, M. Zimmer, RAUCH Landmaschinenfabrik GmbH, Sinzheim

**CULTI CAM HD - Efficient Weed Control in Row Crops using Active Implement Steering and
Stereo Camera** .455
G. L. Andersen, CLAAS E-Systems Verw. GmbH, Nivaa, Denmark;
T. Kuennen, CLAAS E-Systems, Germany

**SunBot: Autonomous Nursing Assistant for Emission-Free Berry Production, General
Concepts and Framework** .463
C. Weltzien, Technische Universität Berlin;
R. R. Shamshiri, Leibniz Institute for Agricultural Engineering and Bioeconomy,
Potsdam-Bornim

Generation of Digital Terrain Models from GNSS Data – Correction signal and working width-based evaluation 471

A. M. Moanță, C. Bartolein, John Deere GmbH & Co. KG, Kaiserslautern;
T. Riedel, Julius Kühn-Institute (JKI), Kleinmachnow;
S. Estel, Central Institute for Decision Support Systems in Crop Protection (ZEPP),
Bad Kreuznach;
C. Federle, Information System for Integrated Plant Production (ISIP), Bad Kreuznach

► Drive Technology

Transferring agricultural machines from field to the laboratory for emission check 479

D. Engelmann, Berner Fachhochschule, Biel, Schweiz;
S. Becker, Karlsruhe Institute of Technology, Karlsruhe;
R. Stirnimann, Berner Fachhochschule, Zollikofen, Schweiz

Overcoming design challenges of electro-hydraulic steering systems – What really happened! 489

T. Rudolph, T. Langer, Danfoss Power Solutions, Nordborg, Denmark;
P. Bolton, Danfoss Power Solutions, Ames IA, USA

Reducing draft force on mounted implements by an electrified traction roller – Traction assistance on a slurry-injecting grubber. 495

J. G. Wiecha, H. Bernhardt, Technical University of Munich, Freising;
T. Bögel, T. Herlitzius, Technical University Dresden

► Tillage and Sowing

Hybrid-Disc-Plough – An energy saving plough concept for heavier soils 503

C. Rechberger, M. Trimmel, HBLFA Francisco Josephinum – BLT Wieselburg;
F.-F. Huber, Ingenieurbüro Huber, Leibnitz, Austria

Concept of a new cultivator generation, reduction of wear costs through a combination of vertical and horizontal tools 509

J. Wiethoff, L. Heier, L. Maas, LEMKEN GmbH & Co. KG, Alpen

Development and utilization of a new application system for precise fertilizer placement in corn	513
M. Bouten, T. Meinel, W. Kath-Petersen, University of Applied Sciences, Technical University Cologne	

Investigation of the working precision and economic efficiency of automatically and manually guided hoes in grain	521
A. Stoll, M. Duttlinger, S. Klasen, Hochschule für Wirtschaft und Umwelt Nürtingen-Geislingen	

► **Combine Harvester**

High Capacity Draper Header – Development of a high capacity draper header for a new generation of combine harvesters	527
B. Yanke, M. Vandeven, D. Bomleny, John Deere Crop Harvesting Product Development Center, East Moline, IL, USA	

New Cleaning system design for high capacity combine harvesters	537
M. L. Bilde, J. T. Andersen, AGCO, Randers, Denmark; A. Morrison, AGCO, Breganze, Italy	

Predictive Feed-Rate Control for Combine Harvesters.	545
P. Münch, John Deere European Technology Innovation Center, Kaiserslautern	

Development of increased tire diameters and the effects on axles and drive trains of a combine harvester.	553
J. Philipp Behra, H. Stockhofe, CLAAS Selbstfahrende Erntemaschinen GmbH, Harsewinkel	

► **Communication**

Security Concept for ISOconnect – a Secure ISOBUS Telemetry Device	561
M. Rothmund, R. Marx, OSB AG, München	

TIM empowers cross vendor couples to higher performance	573
A. Volbracht, CLAAS Selbstfahrende Erntemaschinen GmbH, Harsewinkel; J.-H. Wölker, Agricultural Industry Electronics Foundation AEF e.V., Frankfurt; J. Jeninga, Claas E-Systems GmbH, Bad Saulgau
