Content

Foreword.1

► **Automated Driving**

Collaborative Development of a Test Environment for Automated Driving. 5

T. Fricke, F. Schuck, J. Vogelpohl, BMW Group, Munich;
J. Ax, R. Stolpe, H. Amelunxen, dSPACE GmbH, Paderborn

**Reliable Validation of Highly Automated Driving Functions by Increasing the Virtualization
Level of High Performance Computing Platforms and Smart Sensors 17**

S. Wonneberger, S. Balci, CARIAD SE, Wolfsburg

Removing Blind Spots – Infrastructure-assisted Collective Perception. 29

F. A. Schiegg, I. Llatser, H. Tchouankem, T. Frye, F. Wildschütte, F. Hofmann,
Robert Bosch GmbH, Hildesheim

HERE HD Live Map – more than a sensor for Automated Driving 45

C. Hurasky, HERE Technologies, Frankfurt

**Hybrid collaborative positioning/navigation scheme for performance enhancements and
local perception improvement for automated driving 47**

D. Bartlett, u-blox, Cambridge, United Kingdom;
S. Sesia, u-blox, Thalwil, Switzerland;
T. Yuan Liu, ENAC

The Evolution of Automation in Parking – Assisted, Automated, Autonomous 61

A. Hohm, B. Hartmann, S. Khodaverdian, D. Bosch, B. Lattke, P. Keck, Continental, Frankfurt

Trajectory tracking using Neural Network for Autonomous Driving Systems 75

L. Gonzales-Fuentes, M. Harihar, M. Cassol, Infineon Technologies, Munich

**Ansys Real Time Physics Based Radar Simulation – An Enabler for Machine Learning in the
Context of Autonomous Driving 83**

K. Saad, Ansys Germany GmbH, Otterfing;
A. Sligar, R. Kipp, J. Decker, D. Rey, S. M. Canta, Ansys Inc., USA

**Automated Driving – How cloud infrastructure plays a vital role in future of validation for
Automated Driving? 95**

M. Rath, N. KN, A. K. Laxminarayana, R. Tandon, KPIT Technologies

► **Data Analytics**

Chassis Health Management – End-to-End Architecture and Methods 105
J. Klesing, P. Schmitt, Nexteer Automotive, Auburn Hills, USA

A new perspective for manufacturers: Cloud-based utilization of operational fleet data 117
F. von Bülow, F. Heinrich, Volkswagen AG, Wolfsburg;
T. Meisen, Bergische Universität Wuppertal

Graph-based Vehicle Diagnostics using Machine Learning 131
M. Gresser, M. Mende, BMW Group, Munich;
M. D. Rabe, B. Bäker, A. Unger, Technical University of Dresden, Dresden

► **AI – Self learning vehicles**

AI-based Signal Integrity Monitoring for Integrated Vehicle Health Management 143
S. Apartsin, H. Stein, SafeRide Technologies, Tel Aviv, Israel;
G. Reiter, SafeRide Technologies, Sunnyvale, California, USA;
K. Williams, SafeRide Technologies, Pontiac, Michigan, USA

Make AI Testing Meaningful – From Understanding to Mastering of AI Testing 151
U. Bodenhausen, Vector Consulting Services GmbH, Stuttgart

**Machine learning approach towards remote diagnostics and repair of electric vehicle
charging processes 163**
K. Renatus, A. Unger, B. Bäker, Dresden Institute of Automobile Engineering,
Technical University of Dresden;
O. Manicke, Dr. Ing. h.c. F. Porsche AG, Weissach

**A new approach to make Autonomous Driving safe – How to drive a SOTIF process for a
level 4 driverless automated driving system Subhead. 175**
S. Fülster, S. Hempel, R. Meyfarth, Deep Safety GmbH, Berlin

► Software Technologies

Automotive Software Development – Is it Different?	187
S. Krauß, Vector Informatik GmbH, Stuttgart	
Combined application of agile practices and functional safety in automotive software development	197
S. Kuhn, Elektrobit Automotive GmbH, Erlangen	
Model-Based Systems Engineering accelerated.	205
O. Kath, Senior Director R&D, Ansys Germany GmbH	

► Software

Transformation of the Software Integration Process	215
C. Schwager, ITK Engineering GmbH, Ruelzheim	
Automotive digital twin: An approach for isolating and virtual validating of software updates in end-to-end architectures based on customer vehicles	223
T. Fuchs, O. Manicke, M. Zinser, Dr. Ing. h.c. F. Porsche AG, Weissach; B. Bäker, Dresden University of Technology, Dresden	

► Software Technologies

Virtual software platform for the car – On the road to the next paradigm shift with VIRTIO standards	237
I. Trefz, COQOS HypSDK, Berlin	
AUTOSAR Vehicle Operating System (AVOS) – The Safe and Secure Framework for Automotive System Architectures.	245
G. Reichart, AUTOSAR Spokesperson, Munich; R. Asmus, BMW Group, Chairperson of AUTOSAR, Munich; B. Mattner, AUTOSAR IAO, Munich	
The Case for an Open Integrating Operating System, Middleware Specification Development Approach	257
A. Knoll, Technical University of Munich	
Paving the way for the „Software Defined Vehicle“	273
M. Schleicher, Continental, Frankfurt	

An Eco-System for the Development of Automotive Innovation Roadmaps285

B. Hellenthal, CARIAD SE, Ingolstadt;
C. Grimm, J. Koch, Technical University Kaiserslautern;
A. Breckel, M. Tichy, University Ulm

Future Collaboration Ecosystem for Automotive Microelectronic Innovation Processes.295

C. Heer, Intel Deutschland GmbH, Neubiberg;
J. C. Göbel, D. Mollahassani, S. Forte, Institute of Virtual Product Engineering (VPE),
Technical University Kaiserslautern

► Electronics Innovation

CAN XL: The third CAN protocol generation309

H. Zeltwanger, CAN in Automation (CiA) e. V., Nuremberg

Perceptive Advanced Car-driver Drowsiness Monitoring Neuro-Embedded System. 317

F. Rundo, STMicroelectronics ADG Central R&D, Catania, Italy

Active Acoustics Innovations Supported by Tuning & Prediction Tools 331

Z. Hermon, Silentium, Ness-Ziona, Israel

Digital Light for Digital Live339

M. Kruppa, Audi AG, Ingolstadt

Experience: Driven – The role of in-cabin audio in the vehicles of tomorrow 351

P. Kosak, Bose Automotive Systems, Stow MA, USA

User Experience – The key to successfully combining electric mobility and connectivity 355

A. Matarage, P3 automotive GmbH, Stuttgart

Augmented Reality Guidance based on 6D Positioning and HD Lanes367

C. Cremers, Technical University of Munich;
P. Hubertus, HERE Technologies, Schwalbach;
R. László, Dr. M. Pfeifle, NNG, Budapest, Hungary;
O. Muratov, Artisense, Munich

ShyTech Displays – Enabling a new era of puristic vehicle design and enhanced user experience 381

F. Rabe, Continental Automotive GmbH, Babenhausen

Adaptive Driving Beam [1] – The next mandatory Safety System?389

W. Huhn, Driving Vision News, Neuilly-sur-Seine, France

► **End-2-End Architecture**

Architecting for Secure, Safe and Agile Software Defined Vehicles – Learnings from the Personal Computer industry395
S. Selitrennikoff, Microsoft, Redmond, WA, USA;
M. Ortegón-Cabrera, Microsoft, Aachen

Applying Standards for future Vehicle Diagnostic and Vehicle Lifecycle Management409
O. Meyer, B. Böhlen, DSA Daten- und Systemtechnik GmbH, Aachen

Electric Systems – Simplified and standardized engineering for sophisticated automotive electric/ electronics.423
R. Milke, Volkswagen AG, Wolfsburg

New architecture approaches and their impact on automotive wiring harness.427
O. Bettgens, CARIAD SE, Wolfsburg

New Automotive E/E architecture and how TC4xx enables it – From domain-based to zone-based approach.429
K. Heurtefeux, M. Kumar, M. Cassol, Infineon technologies, Neubiberg

A Safety-Certified Vehicle OS to Enable Software-Defined Vehicles435
J. Becker, D. Pangercic, Apex.AI, Inc., Palo Alto, CA, USA

Safety Architectures for Automotive Cross Domain Servers – Challenges and Potentials447
D. Geyer, C. Miedl, AVL Software and Functions GmbH Regensburg

► E-Mobility

Wireless Charging for Electric Vehicles with its Boundary Conditions – A Contribution for Market Breakthrough	459
M. Böttigheimer, T. Lämmle, C. Lämmle, V. Schall, A. Wiebelt, MAHLE International GmbH, Stuttgart	
Electric Charge Lid – System components for future charge lid systems	475
J. Langkau, S. Wenz, T. V. Fernandez, HELLA GmbH & Co. KGaA, Lippstadt; L. Püllen, InnoSenT GmbH, Donnersdorf; A. Tekavčič, N. Jezeršek, A. Wagner, Hella Saturnus Slovenija d.o.o., Ljubljana, Slovenia	
Evaluation of a driver's compatibility with electric, plug-in hybrid, and hybrid vehicles based on mobility patterns analytics	489
G. Castignani, F. Chandelle, S. Jafarnejad, I. Scherer, Motion-S S.A., Mondorf-les-Bains, Luxembourg	
CharIN e.V. – Empowering the next level of e-mobility	501
C. Bracklo, M. Keller, CharIN e.V., Berlin	
Wireless Charging Systems for EVs – The answer to the consumers demand!	505
T. Nindl, BRUSA Elektronik (München) GmbH, Munich	
Real-time Contextual Intelligence Services for Connected Electrified Vehicles	509
S. Alexander, WideSense, Berkeley, CA, USA; F. Borrelli, University of California, Berkeley, CA, USA; M. Pfeifle, NNG, Budapest, Hungary	

► **E-Vehicle**

**How to solve the trade-off between vehicle dynamics, traveling time and CO₂ emissions.
The CO₂-Life Cycle Assessment for the Porsche Taycan523**
O. Bitsche, Dr. Ing. h.c. F. Porsche AG, Weissach

Modular, standardized, and innovative Power Electronics for Automotive.533
J. P. Mercier, O. Ploix, Renault Group, Guyancourt, France

**Long distance e-mobility in the trade-off between battery capacity & charging power –
Battery immersion cooling as enabler technology?545**
D. Mehlig, M. Müller, J. Treier, A. Loges, MAHLE International GmbH, Stuttgart

Shifting Left the development of Electric Vehicle Products, from System to Software563
K. Brand, Synopsys Inc, Mountain View CA, USA

**A Battery Digital Twin framework for Predictive Maintenance and State of Health Estimation
of Electric Vehicles.579**
A. P. Das, K. Thomas, A. Mohan, A. S. Akhil, K. P. Ganesh, Tata Elxsi Ltd., Trivandrum, India

**Towards lead-acid free 12 V power supply for electrified vehicles and highly automated
driving functions593**
B. Kleinsteinberg, A. Hohenhövel, HELLA GmbH & Co. KGaA, Lippstadt

**State of Health and State of Charge Estimation method – A Machine Learning based
hybrid approach605**
M. Ghivari, D. Chakraborty, KPIT Technologies GmbH, Munich

► **Security**

**Scalable Automotive Intrusion Detection Systems – From the ECU to the Vehicle
Operation Centre.** 613
E. Metzker, M. Engelsberger, Vector Informatik GmbH, Stuttgart

The Crossroads of Automotive Security and GDPR 623
M. Wachs, INEOS Automotive GmbH, Böblingen;
J. Jäger, TÜV SÜD Auto Service GmbH, Garching;
A. Berthold, LDA Brandenburg, Kleinmachnow

**Implementing adequate security for UN R 155 with AUTOSAR – Retrofitting existing
architectures** 641
M. Minzlaff, M. Rücker, M. Schneider, ESCRYPT, Berlin/Stuttgart

5G and Artificial Intelligence transforming Cars and the Transportation System. 651
S. Marxreiter, Qualcomm CDMA Technologies GmbH, Munich

Concept ELV² – Development of an Electric Drive Axle for Heavy Commercial Vehicles. 653
S. Köller, R. Uerlich, G. Witham, L. Eckstein, RWTH Aachen University

OHNE PROTOTYP GEHT NICHTS IN SERIE.

Unser Podcast ist das Werkzeug, mit dem Sie Ihre Karriere in allen Phasen entwickeln – vom Studium bis zum Chefessel. Egal, ob Sie Ingenieur*in, Mechatroniker*in oder Wissenschaftler*in sind: Prototyp begleitet Sie. Alle 14 Tage hören Sie die Redaktion von INGENIEUR.de und VDI nachrichten im Gespräch mit prominenten Gästen.
