► **Electrical Agricultural Machines**

Structuring of electrified agricultural machine systems – Diversity of solutions and analysis methods1
L. Frerichs, L. Buck, Institute of Mobile Machines and Commercial Vehicles (IMN)
Technical University Braunschweig

GridCON2 – Development of a Cable Drum Vehicle Concept to Power 1MW Fully Electric Agricultural Swarms 11
A. Klein, M. Kissel, P. Pickel, John Deere GmbH & Co. KG, Kaiserslautern;
F. de Moraes Boos, V. Kegel, John Deere GmbH & Co. KG, Mannheim

GridCON Swarm – Development of a Grid Connected Fully Autonomous Agricultural Production System.17
F. de Moraes Boos, S. Pfaffmann, V. Kegel, John Deere GmbH & Co. KG, Mannheim

Fully electric Tractor with 1000 kWh battery capacity23
M. Kissel, N. Tarasinski, A. Klein, John Deere GmbH & Co. KG, Kaiserslautern
V. Kegel, F. de Moraes Boos, John Deere GmbH & Co. KG, Mannheim

► **Soil and Modelling**

The Integration of a Scientific Soil Compaction Risk Indicator (TERRANIMO) into a Holistic Tractor and Implement Optimization System (CEMOS)29
C. Birkmann, J. Wieckhorst, J. Pieper, C. Ehlert, CLAAS Tractor, Paderborn;
R. Stirnimann, M. Stettler, Bern University of Applied Sciences, HAFL, Switzerland

Identification of draft force characteristics for a tillage tine with variable geometry.37
S. Schwede, T. Herlitzius, Faculty of Mechanical Engineering and Science, Institute of Natural Materials Technology, Technical University Dresden

Calibration of soil models within the Discrete Element Method (DEM)45
K. Palm, J. Guo, L. Frerichs, Institute of Mobile Machines and Commercial Vehicles, Technical University Braunschweig;
A. Eitzlmayr, Linz Center of Mechatronics GmbH, Linz, Austria;
F. Maier, PÖTTINGER Landtechnik GmbH, Grieskirchen, Austria;
P. Seil, DCS Computing GmbH, Linz, Austria

Automation and Optimization of Working Speed and Depth in Agricultural Soil Tillage with a Model Predictive Control based on Machine Learning55
S. Becker, B. Kazenwadel, M. Geimer, Karlsruhe Institute of Technology (KIT), Karlsruhe

► **Control and Process Optimisation**

Synchronising machine adjustments of combine harvesters for higher fleet performance65
I. Beermann, CLAAS Selbstfahrende Erntemaschinen GmbH, Harsewinkel;
A. Kipp, CLAAS E-Systems GmbH, Dissen

**A generic approach to bridge the gap between route optimization and motion planning for
specific guidance points of highly automated machines71**
A. Grever, Maschinenfabrik Bernard KRONE GmbH & Co. KG, Spelle;
M. Mütter, LEMKEN GmbH & Co. KG, Alpen;
B. Johanning, Hochschule Osnabrück

**Efficient Multi-Robot Path Planning for Autonomous Weed Control on Complex Field
Configurations79**
F. Keppler, N. Dunkelberg, S. Wagner, Fraunhofer IVI, Dresden;
K. Janschek, Technical University Dresden

**Automatic residue spreading control based on radar sensing technology on a
combine harvester.87**
A. Leenknecht, T. Mahieu, G. Nerinckx, B. Lenaerts, B. Missotten, CNH Industrial Belgium,
Zedelgem, Belgium

► **Robotics in Weed Control**

**Dual use sensor array for crop management in arable farming by CIELab color space –
detection of N supply and plant discrimination97**
A. Christ, O. Schmittmann, P. Schulze Lammers, Institute of Agricultural Engineering,
University of Bonn

Selective weed control in grassland using high-pressure water jets105
F. Martin, G. Lohrmann, A. Stoll, Hochschule für Wirtschaft und Umwelt Nürtingen-Geislingen,
Nürtingen

**Practice of autonomous field robotics compared to a tractor-implement-combination for
the example of mechanical weed control111**
C. Scholz, B. Pamornnak, S. Becker, A. Ruckelshausen, University of Applied Sciences
Osnabrück

**Automated Droplet Size and Rate Control via Electromechanically Actuated Variable-Orifice
Nozzles and Boom Pressure.117**
R. A. Rohrer, J. D. Luck, University of Nebraska-Lincoln, Lincoln, NE, USA

► Hydraulic systems

- Increased Dynamics and System Efficiency with Position-Controlled Hydraulic Cylinder 125**
N. Strieker, T. Kohmäscher, CLAAS Selbstfahrende Erntemaschinen, Harsewinkel
- Development of hydraulic drive systems in the context of electrified work machines 133**
A. Opgenoorth, K. Schmitz, RWTH Aachen University, Institute for Fluid Power Drives and Systems (ifas), Aachen
- Hybrid and full-electric solution for Telescopic Handler. 147**
G. Fiocchi, Carraro S.p.a., Campodarsego (PD), Italy

► Sensor

- Localization with a ground penetrating radar in harsh agricultural environments 153**
I. Stasewitsch, J. Schattenberg, L. Frerichs, Institute of Mobile Machines and Commercial Vehicles, Technical University Braunschweig;
K. Krüger, J. Schöbel, SF Microwave GmbH, Braunschweig;
M. Lehr, T. Neugebauer, Götting KG, Lehrte
- Evaluation of perception sensors for safety of highly automated machine operations. 163**
C. J. Lee, S. Schätzle, S. A. Lang, Sensor-Technik Wiedemann GmbH, Kaufbeuren
- Innovative surround sensing conquers the agricultural market!**
Vision System – a pioneering sensor system for diverse use. 171
M. Wesle-Zehetmair, Bosch Engineering GmbH, Holzkirchen;
C. Engelhart, C. Marbach, C. Engelhart, Bosch Engineering GmbH, Abstatt
- Concept of a Test Environment for the Automated Evaluation of Algorithms for Robust and Reliable Environment Perception 177**
C. Krause, N. Iqbal, J. Hertzberg, M. Höllmann, DFKI GmbH, Kaiserslautern;
J. Martinez, D. Nieberg, A. Ruckelshausen, Hochschule Osnabrück, Osnabrück;
S. Stiene, DFKI GmbH, Kaiserslautern, Hochschule Osnabrück, Osnabrück;
S. Röttgermann, M. Müter, LEMKEN GmbH & Co. KG, Alphen;
A. Berghaus, J. Herbers, S. Menke, Maschinenfabrik Bernard Krone GmbH, Spelle

► **Product Development**

A Study on Improving Cross-Company Co-Operation by Systems Engineering Implementation and Application 185
C. von Holst, John Deere GmbH & Co KG, Mannheim;
O. Klaar, ZF Friedrichshafen AG, Friedrichshafen

Frugal Innovation – “Doing more with less” 193
K. Singh Sian, CLAAS Combines C-F, Harsewinkel

Aspects of sustainability improvement in the design of future agricultural systems 203
M. Holovač, J. Krzywinski, Technical University Dresden

Validation Principles of Agricultural Machine Multibody Dynamics Models 219
B. Adams, Iowa State University, Ames, Iowa, USA

► **Harvesting**

Quantification of operator assist features' impact on grain cart operation 227
R. Buchaca, T. Langer, AGCO A/S, Randers, Denmark

Automatic adjustment of auger headers with variable table length to improve a continuous crop flow and reduce pickup grain losses of a combine harvester 235
D. Neitemeier, S. Spiekermann, D. Irmer, J. Baumgarten, A. Wilken,
CLAAS Selbstfahrende Erntemaschinen GmbH, Harsewinkel

Compact cooling system set-up with an innovative pre-cleaning solution for a mid-range combine harvester application 243
D. Thüte, J. Furmaniak, A. Alterbaum, CLAAS Selbstfahrende Erntemaschinen GmbH,
Harsewinkel

► **Decision Support**

Private mobile ad hoc communications and the application in LANDNETZ 251
A. Hecker, Vodafone Chair Mobile Communications Systems;
B. Striller, Chair Agricultural Systems and Technology, Technical University Dresden;
N. Franchi, Institute for Electrical Smart City Systems, Friedrich-Alexander University
Erlangen-Nürnberg

**N-Time: An Automated Decision Support System for Sensor-Based Fertigation
Management** 259
J. S. Stansell, J. D. Luck, T. G. Smith, H. Yu, D. R. Rudnick, B. T. Krienke, University of Nebraska -
Lincoln, Lincoln, NE, USA

**Generating High-Definition As-Applied Maps for Pneumatic Fertilizer Application
Equipment** 265
J. P. Fulton, R. Colley III, S. A. Shearer, E. M. Hawkins; Ohio State University, Columbus,
Ohio USA

**A Modular Approach for a Dialog Based Assistance System to Adjust and Optimize Machines
and Machine Combinations for Different Agricultural Applications** 273
Y. Ehlert, CLAAS KGaA mbH, Harsewinkel

► **Management of Grassland**

Spot spraying broad-leaved dock plants in meadows 279
T. Anken, A. Latsch, M. Hatt, Agroscope, Ettenhausen, Switzerland

**Tractor-mounted implement with section control and small-scale robot: Monte Carlo-based
scenario analysis for effective weed control in extensive grassland** 285
L. Petrich, V. Schmidt, Ulm University;
A. Stoll, Hochschule für Wirtschaft und Umwelt Nürtingen-Geislingen, Nürtingen

Estimation of grassland yield from satellite data with ANN based transfer learning 293
E. Eder, P. Riegler-Nurscher, Josephinum Research Wieselburg, Austria;
J. Prankl, Farmdok GmbH, Wieselburg, Austria

Stereo camera-based method for grassland yield estimation 301
P. Riegler-Nurscher, J. Prankl, Josephinum Research, Wieselburg, Austria;
D. Schauer, Pöttinger Landtechnik GmbH, Grieskirchen, Austria

► **Tillage and Soil**

Analysis of abrasive wear of tillage tools on both macro- and microscopic level309
J. Guo, L. Frerichs, Institute of Mobile Machines and Commercial Vehicles, Technical University Braunschweig;
F. Shen, S. Münstermann, Steel Institute, RWTH Aachen University

Combi-mulcher – Development of a modular biomass processing and soil blending system 317
S. Geißler, T. Herlitzius, Technical University Dresden

A tyre integrated sensor to monitor real time soil physical properties327
A. Paturle, F. Pinet, Michelin, Clermont-Ferrand, France;
A. Duparque, D. Martin, V. Tomis, AgroTransfert RT, Estrées Mons, France;
O. Scheurer, C. Ugarte, UniLasalle, Beauvais, France;
M. Lefebvre, Limagrain, Saint-Beauzire, France

New Tire Technologies vs. Tracks – A Controlled Field Investigation to Assess Productivity335
A.A. Klopfenstein, C. R. Dean, R. Venkatesh, S.A. Shearer, The Ohio State University, Columbus, OH, USA

► **Automation**

Yield observation outlier detection with unsupervised machine learning in harvest machines343
M. Abdipourchenarestansofla, John Deere, European Technology and innovation Centre, Germany, Kaiserslautern;
H. P. Piepho, Biostatistics unit, Institution of Crop Science, University of Hohenheim

Multi-Sensor Data Fusion with Fuzzy Knowledge-based Controller for Collision Avoidance of a Mobile Robot349
R. R. Shamshiri, C. Weltzien, T. Schütte, Leibniz Institute for Agricultural Engineering and Bioeconomy, Potsdam, FG Agromechatronik, Technical University Berlin

Fundamental Concept for Highly Automated Implements with Distinct Regard To Process Automation.359
S. Röttgermann, S. Haverkamp, LEMKEN GmbH & Co. KG, Alpen

► **Electric Applications**

Latest technology solutions for Charging and e-Machines – how off-road and agriculture applications can benefit from automotive innovations365
S. Prüfling, B. Langer, AVL Software and Functions GmbH, Regensburg

Tractor equipped with an external electric generator combined with electric powered Sprayer and Mulcher performances evaluation381
M. Varani, G. Molari, Alma Mater Studiorum - University of Bologna, Bologna, Italy;
M. Mattetti, University of Bologna, Bologna, Italy;
S. Fiorati, N. Lenzi, CNH Industrial - Advanced Technology & Innovation, Modena, Italy;
M. Montanari, NOBILI S.p.A - R&D, Technical Department, Molinella (Bologna), Italy

Airblast sprayer electrification for real-time, continuous fan-airflow adjustment according to canopy density during pesticide application in 3D crops.389
M. Grella, P. Marucco, F. Gioelli, P. Balsari, DiSAFA, University of Turin, Grugliasco, Italy;
L. Athanasakos, N. Mylonas, S. Fountas, Agricultural University of Athens, Athens, Greece;
I. Zwervaegeher, D. Nuytens, ILVO, Merelbeke, Belgium;
A. Caffini, Caffini S.p.a., Palù, Italy;
F. Meroni, KEB ITALIA S.r.l. Unipersonale, Settimo Milanese, Italy;
R. Rossi, TOPCON Agriculture S.r.l., Torino, Italy

► **Networks and Bus Systems**

AEF Wireless In-Field Communication – Common Coverage Map as a first application for interoperable cooperative field work.	397
M. Rothmund, OSB connagtive GmbH, München;	
J. Witte, CLAAS Selbstfahrende Erntemaschinen, Harsewinkel;	
N. Wolniak, HTW Saar, Saarbrücken;	
T. Nothdurft, AGCO, Marktoberdorf	
Lost, but reconnected virtually – AEF ISOBUS Plugfest is back and better than ever.	405
M. Brück, AEF e.V., Frankfurt	
Farming 4.0 ready telematics unit for basic, non-intelligent agricultural machines.	413
F. Kraatz, Maschinenfabrik Bernard Krone GmbH & Co. KG, Spelle	
AEF – Agricultural Interoperability Network	419
V. Zippel, CLAAS E-Systems GmbH, Dissen a.T.W.;	
A. Olliver, CNHi International SA, Lugano, Switzerland;	
S. Stesny, AGCO GmbH, Marktoberdorf;	
H. J. Nissen, John Deere GmbH & Co. KG, Kaiserslautern;	
F. Ahlers, AgBRAIN GmbH, Osnabrück	

► **Alternative Fuels**

Applicability Evaluations of Methane based Powertrain and Energy Storage Systems on High Performance Harvesting Machine Applications.	423
F. Wohlfahrt, T. Göres, S. Terörde, CLAAS Selbstfahrende Erntemaschinen GmbH, Harsewinkel;	
L. Frerichs, Institute of Mobile Machines and Commercial Vehicles, Technical University Braunschweig	
Challenges in the Use of Alternative Fuels: Solutions to handle Boil-Off Gas in Agricultural Machines	431
F. Pult, A. Stein, M. Geimer, Institute for Mobile Machines, Karlsruhe Institute of Technology (KIT)	
The Multifuel Tractor – A Flexible Fuel Option to Reduce Fossil Fuel Consumption.	441
A. Schröder, P. Pickel, John Deere GmbH & Co. KG, Kaiserslautern;	
P. Emberger, J. Spiegel, E. Remmele, Technologie- und Förderzentrum, Straubing	

► **Harvesting 2**

Adaptive control of a self-propelled sugar beet harvester447
S. Schwich, J. Schattenberg, L. Frerichs, Institute of Mobile Machines and Commercial Vehicles, Technical University Braunschweig;
M. Gallmeier, Holmer Maschinenbau GmbH

Influence of design and operating parameters on crop-flow characteristics in a self-propelled forage harvester (SPFH) using experimental and numerical methods457
A. Lindenberger, M. Uhl, M. Frank, AGCO GmbH, Marktoberdorf

Current Developments and Challenges in the Range of Tractor Mounted Forage Harvesters465
M. Mösker, Maschinenfabrik Bernard KRONE GmbH & Co. KG, Spelle

► **Communication**

Machine operation task analysis – A deeper look into the shift of task profiles within operating agricultural cyber-physical production systems473
S. Lorenz, Technical University Dresden

Virtual CAN Network for Remote Development of ISOBUS Devices485
S. Brodie, T. Oksanen, Chair of Agrimechatronics and Munich Institute of Robotics and Machine Intelligence (MIRMI), Munich, Technical University of Munich (TUM)

The importance of data quality assessment for machinery data in the field of agriculture495
M. Abdipourchenarestansofla, John Deere, Kaiserslautern;
C. Schroth, Fraunhofer IESE, Kaiserslautern

► Data Analysis and Exchange

FMIS evaluation and user experience within "Landnetz" 501

T. Herlitzius, B. Striller, Faculty of Mechanical Engineering and Science, Technical University
Dresden;

N. Staemmler, T. Pohl, Saxon State Office for Environment, Agriculture and Geology

Data Spaces in Agriculture – Status Quo and Perspectives 511

J. Doerr, Technical University Kaiserslautern and Fraunhofer IESE;

R. Kalmar, B. Rauch, Fraunhofer IESE, Kaiserslautern;

S. Stiene, DFKI and HS Osnabrück, Osnabrück

► Tractor

Analysis of the tractor behavior on a powertrain test bed for tractor-specific maneuvers . . . 521

C. Schoerghuber, M. Ortner, M. Resel, AVL List GmbH, Steyr, Austria;

R. Schantl, S. Puster, AVL List GmbH, Graz, Austria

Feasibility study of an idling-stop device on agricultural tractors 529

M. Mattetti, M. Varani, G. Molari, Department of Agricultural and Food Sciences –

Alma Mater Studiorum, University of Bologna, Bologna, Italy

S. Fiorati, N. Lenzini, CNH Industrial – Advanced Technology & Innovation, Modena, Italy

► ISOBUS and Networks

Artificial Intelligence based Grainloss Calculator and Real Time Connected APP. 535

M. Verhoeven, B. Missotten, J. Clarisse, S. Van Campenhout, S. Devos, CNH Industrial

Belgium N.V., Zedelgem, Belgium

Faster CAN for better interplay with highspeed ISOBUS. 541

P. Fellmeth, Vector Informatik GmbH, Stuttgart

AEF – High Speed ISOBUS – Technology Readiness for a Next Generation Network 551

D. Smart, John Deere, USA

V. Brill, CLAAS E-Systems GmbH, Dissen

BEST MATCH for BEST TALENTS

INGENIEUR.de
BEST MATCH

powered by

So findet Sie Ihr Traumjob!

Ingenieure aller Fachrichtungen, Absolventen und wechselwillige Professionals aufgepasst:

Sagen Sie uns, was Sie können, wollen und lieben – dann bieten Ihnen die besten Unternehmen den passenden Job für Ihr Talent. Schnell, unkompliziert, ohne Aufwand.

DAS SIND IHRE VORTEILE:

Einfache Profilerstellung | Persönliche Beratung | Passgenaue Job-Angebote |
Keine aufwändige Job-Suche | Unternehmen bewerben sich bei Ihnen | Kostenfreie Nutzung |

Transparenz: alle wichtigen Informationen zum Traumjob |

Sicher: Ihr Arbeitgeber hat keine Einsicht in Ihr Profil

JETZT ALS TALENT REGISTRIEREN:
